Education

Dr. APJ Abdul Kalam Technical University

Bachelor of Technology in Computer Science – 8.2 CGPA

2021 – 2025

Moradabad, UP

MDS Inter College

12th – 84% – UP Board

2020 – 2021

Najibabad, UP

Experience

Software Developer *AppSquadz*

March 2025 – Present

- Architecting scalable backend systems using **NestJS** with modular design and robust **Dependency Injection**.
- Building high-performance **REST APIs** with secure and scalable authentication using **JWT** and **RBAC**.
- Developing admin panels using **Laravel**, enabling efficient role-based workflows and seamless data management.
- Optimizing database performance with **SQL queries**, handling relational data, ensuring low-latency responses.

Web Development Intern *Explorin.io* – Certificate

July 2024 – August 2024

- Acquired expertise in modern web development technologies including **ReactJS**, **NodeJS** and **Tailwind CSS**.
- Gained practical experience through project-based learning, equipping according to latest industry standards.
- Worked with **MongoDB** database, enhancing backend development by managing and querying data effectively.
- **Technologies:** ReactJS, NodeJS, ExpressJS, MongoDB, Git/GitHub, Postman, HTML, CSS, JavaScript

Projects

AI Job Matching Platform | *TypeScript, Express, MCP SDK, Clerk Auth, Zod, REST APIs* | [Live Demo](#)

- Built an AI-powered Job Matching Platform using the **Model Context Protocol (MCP)**, enabling AI assistants to manage and match candidate profiles and job postings through natural language interactions.
- Designed a modular MCP server with 8 **AI-consumable tools** and **Dynamic resources**, supporting profile or job creation, filtering, matching, and secure execution for AI-driven operations across multiple services.
- Implemented **Clerk-based OAuth** authentication, **Zod schema validation**, and role-based request handling to ensure secure and reliable communication between AI clients and backend services at scale.
- Architected a scalable backend system using Express and MongoDB with REST APIs, supporting dual transport layers (HTTP and Stdio) to efficiently integrate external AI clients and tool interactions.

DineEase | *ReactJS, Redux, Tailwind, NodeJS, ExpressJS, MongoDB, JWT, bcrypt, Cloudinary* | [Live Demo](#)

- Built a role-based cafeteria WebApp with **real-time ordering**, **dynamic menu updates**, and counter management workflows to streamline operations, improve order handling and reduce customer wait times.
- Ensured a smooth user experience with secure **refresh and access** token authentication, **Redux**-managed state, instant **Toastify** notifications and scalable backend APIs for seamless order and user management.

InnoLearn | *ReactJS, Tailwind, Shadcn, NodeJS, ExpressJS, MongoDB, JWT, bcrypt, Cloudinary* | [Live Demo](#)

- Created an e-learning platform with **personalized courses**, **live video streaming** for **real-time classes**.
- Designed a **responsive and intuitive UI** for students to access live classes, track progress, and interact with instructors, while giving teachers tools to manage **courses**, **assignments**, and **real-time teaching**.

Technical Skills

- **Languages:** JavaScript, TypeScript, C++, PHP, Java, SQL
- **Frameworks & Backend:** Redux, NodeJS, ExpressJS, NestJS, Laravel, CodeIgniter
- **Databases & Frontend:** MongoDB, MySQL, ReactJS, HTML, CSS, TailwindCSS, Bootstrap, Shadcn/UI
- **Tools & Platforms:** Git, GitHub, Bitbucket, Postman, XAMPP, phpMyAdmin, VS Code, IntelliJ, Canva

Leadership / Extracurricular

- Led a team in developing and presenting the final-year project, coordinating tasks and deadlines.
- Ensured alignment with project goals by managing resources, tracking progress, and addressing issues effectively.
- Secured 1st prize in the Computer Science Student's Society (CSSS) event in 2nd year.
- Participated in the Smart India Hackathon consecutively in 2023 and 2024.
